EDUCATION

Bachelors in Engineering, Electrical and Electronics Engineering (2019 - 2023)

University of Ilorin,Kwara State

KEY SKILLS

JavaScript, Node.js, TypeScript, Express, React.js, TailwindCss, Scss, Python, BootStrap,Styled Component, Nest.js,React Native,Angular, Docker, GraphQL, API Testing, API Intergration, Blockchain web3, AWS, GCP, CI/CD, Git Github, Notion, SEO

CI/CD Experience:

Git, GitHub,

Operating System:

Windows, Mac OS

SOFT SKILLS:

Collaboration,Communication ,Critical Thinking, Problem Solving, Adaptability, Remote Team Collaboration, Quick Adaptability to new Technologies,Open to learn new things

LANGUAGES

English (Fluent)

Technical Skills

- **Frontend:** Experience building seamless and optimized webapps using **React.js, Vue.js, Angular, HTML5, CSS3, SCSS, Bootstrap, TailwindCSS**
 - **Backend:** Experience building server side softwares using **Node.js, Express.js, python, TypeScript, Nest.js, GraphQL, REST API**
 - **Blockchain & Web3:** Basic experience in blockchain integration, web3 technologies
 - **Database:** Experience in database, **NoSQL Database MongoDB, MySQL**
 - **Cloud Services:** Experience in building and working with Technologies such as **AWS, Google Cloud Platform (GCP)**
 - **DevOps:** Experience in using **GIT** and **GitHub** for building efficient CI/CD pipelines
 - **Tools:** **Git, GitHub, Postman, SEO, Notion, Docker**
 - **Soft Skills:** Problem Solving, Communication, Team Collaboration, Adaptability
-

Work Experience

Senior Frontend Developer

StudyMeister — May 2024 – Present

Duration: Ongoing

Roles and Responsibilities:

- Developed and optimized responsive user interfaces using **React.js, TypeScript**, and **TailwindCSS**.
- Collaborated with backend teams to integrate an AI-powered content generation system.
- Implemented interactive components providing real-time feedback to users.
- Ensured cross-browser compatibility and mobile responsiveness.

Projects Worked On:

- **StudyMeister AI Content Platform:** AI-powered platform for students and writers to generate project content.

Project Deliverables:

- Successfully increased platform usability by 20% with responsive UI.
- Reduced document creation time by 30% through AI content generation integration.
- Improved user engagement by 25% through real-time interactive feedback.

Tools & Technologies: React.js, TypeScript, TailwindCSS, JavaScript, Node.js, Express, MongoDB, Git, GitHub, Postman

Senior Frontend Developer

SwiftlyHost — *January 2021 – Present*

Duration: 3+ years

Roles and Responsibilities:

- Led frontend development for SwiftlyHost's MVP, integrating **Angular**, **TypeScript**, and **Node.js**.
- Implemented SEO optimization strategies, improving Google search rankings.
- Collaborated with backend developers and product designers to ensure efficient API integration.
- Supervised the brand identity team to enhance user retention through improved design and UX.

Projects Worked On:

- **SwiftlyHost Web Hosting Platform:** Cloud-based platform for hosting services and domain purchases.

Project Deliverables:

- Successfully launched the MVP, increasing customer sign-ups by 30%.
- Improved organic traffic by 25% through SEO optimization.
- Boosted customer retention by 15% through a more intuitive user experience.

Tools & Technologies: React.js, TypeScript, JavaScript, Node.js, Express, Google Cloud Platform (GCP), TailwindCSS, MySQL, Docker, Git, GitHub

Senior Frontend Developer

Smartlearn — October 2019 – September 2020

Duration: 1 year

Roles and Responsibilities:

- Led frontend development for **Smartlearn**, using **Vue.js** and **TypeScript**.
- Integrated video, document, and live streaming content delivery systems for online learning.
- Ensured cross-platform accessibility across desktop, tablet, and mobile devices.

Projects Worked On:

- **Smartlearn Edtech Platform:** Online education platform offering vocational courses in multiple formats.

Project Deliverables:

- Delivered a fully responsive UI, increasing platform engagement by 20%.
- Successfully launched the MVP on time and within budget, attracting new users.

Tools & Technologies: Vue.js, TypeScript, JavaScript, TailwindCSS, Node.js, Express, MongoDB, Git, Docker

Frontend Developer

LorenzoTvmedia — May 2017 – July 2019

Duration: 2+ years

Roles and Responsibilities:

- Developed and launched LorenzoTvmedia's media platform using **React.js**.
- Created a blog platform with up-to-date news on tech, startups, and entertainment.
- Collaborated with backend developers to integrate a content management system (CMS).

Projects Worked On:

- **LorenzoTvmedia Platform:** Media platform providing free access to movies and entertainment content.
- **LorenzoTvmedia Blog:** News blog focused on tech, startups, finance, and entertainment.

Project Deliverables:

- Increased platform traffic by 35% post-launch through responsive UI and SEO improvements.
- Delivered the blog with full CMS integration, allowing for easy content updates.

Tools & Technologies: React.js, TypeScript, JavaScript, TailwindCSS, Node.js, Express, MySQL, Git, GitHub

Junior Frontend Developer

One Credit Pay Solutions Limited — *October 2016 – May 2017*

Duration: 8 months

Roles and Responsibilities:

- Redesigned and optimized the company website using **Angular**, **HTML5**, and **CSS3**.
- Contributed to the development of a fintech platform offering airtime purchases and utility bill payments.
- Collaborated with backend engineers to integrate secure payment gateways.

Projects Worked On:

- **One Credit Pay Platform:** Fintech platform focused on airtime and utility bill payments.

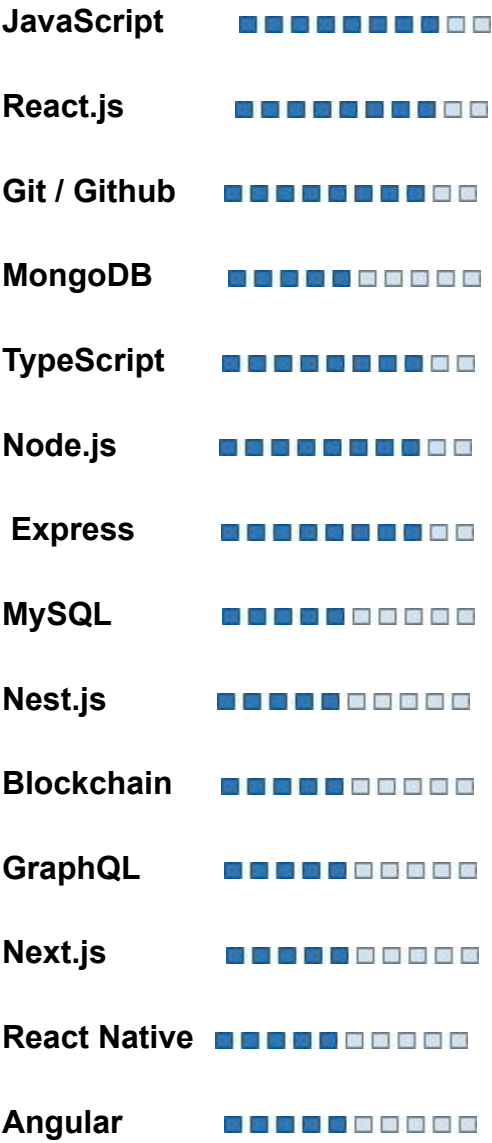

Project Deliverables:

- Improved website responsiveness and user engagement by 20%.
- Successfully integrated secure payment gateways, increasing transaction volume.

Tools & Technologies: React.js, TypeScript, HTML5, CSS3, JavaScript, Node.js, Express, MySQL, Git, GitHub
